CCSDS Technical Organization

CCSDS Engineering Steering Group

- CESG Chair and Deputy
- 6 Area Directors & Deputies
- Review and approve documents for technical content (and other criteria)

CCSDS Working Organization

- 6 areas of work
- Total of 23 Working Groups (Spring 2022)
- Create projects & produce documents

But ... just what does the CESG do?

- **“The CCSDS Engineering Steering Group (CESG) is responsible for technical management across CCSDS domains and for the top-level coordination of the overall international standardization process.”**
 - **“A candidate for selection as CESG chair, Area Director, or their deputies must have demonstrated the ability to function independently of his/her own agency’s agenda and to be able to fairly lead the development of international consensus. “**
- **“Providing the CCSDS-wide forum where the work programs of the Areas may be coordinated and synchronized in the context of an overall architecture for space- mission cross support and the needs of individual customers”**

- **“Ensuring that all CCSDS work follows the set of architectural principles agreed to by the CESG and is properly synchronized with work in other areas and with the smooth evolution of the large installed base of CCSDS-compatible mission-support infrastructure”**
- **“Identifying “red flag” items where technical work in a proposed CCSDS document is not of the required quality or nature ... or where significant issues exist”**
- **Final technical approval before release for agency review or publication**
